### Part Marking:

- Marking consists of a manufacturing date code
- Orientation of marking may be mixed on the tape
- Traceability of part's specification is lost once removed from reel

### Layout and application information

- Trace lengths to the crystal should be kept as short as possible.
- The crystal connections are sensitive to noise.
- The signal leads to the SM7S, in most oscillator applications, are exceptionally high impedance.  
 Remember to protect these leads from moisture and contamination as leakage paths can inhibit proper oscillator function.

### Reflow Cycle (typical for lead free processing)

The part may be reflowed 2 times without degradation.

### Tape and Reel: available for quantities of 3000 per reel
