

***Due to decreasing demand,
these low frequency
(less than 70MHz)
metal package through hole oscillators
were discontinued***

P11xx-HC
P11xx-3S
SQ22xx
SQ33xx

November 2009

Pletronics can quote and supply FR4 adapter boards such that a SM77 5x7mm SMD device can fit a DIP/DIL oscillator through hole footprint.

The higher frequency P11 and SQ33 devices are continuing to be available except 5.0V devices. These devices are made with an SM77 series SMD oscillator inside.
